See over for Summary and Guidance

PART TWO: SUMMARY

Try to write 3 or 4 sentences that sum up the key qualities and character of the street, both positive and negative. Although you have been asked in earlier sections to give your opinion on things, this is where we really need to know what the street 'feels' like and what you think about its overall character.

The street feels rather dead; it is neither clearly a residential street or a commercial street. That is probably mainly because it is a relatively significant through traffic route. Looking carefully there are in fact some quite interesting buildings, and a good variety – larger at the top, smaller lower down

PART THREE: DESIGN GUIDANCE

Make some brief notes here about what you believe to be the key things that any future designer should be aware of and respond to in order to ensure that their design respects and enhances the street's character. (NB. Avoid saying 'make it look just like the others'!)

Any emerging site likely to be small, care needed to draw guidance from the immediate surroundings. Important to keep to front of pavement as building line. Use of render probably most appropriate (very few buildings in brick).

Watch out for possible new church building!
